Vehicle Make: Model Year:	Silver Eagle 2015
Date:	July 2, 2014
Updated:	Steve Sutton
SILVER EAGLE PART #	32850 Pilot Date: August 26, 2014
GENERAL:	
MAKE & MODEL:	V2\$T-20NU
LENGTH:	OVERALL: 119"
WIDTH:	96" 71-1/2" track
FIFTH WHEEL HEIGHT:	47-1/2"
DRAWBAR LENGTH:	78" Centerline Eye to Axle
HITCH HEIGHT:	17"
OPERATIONAL USE:	HIGHWAY
GAWR:	20,000#
GVWR:	20,000#
TARE WT:	2950# maximum
FRAME:	
DRAWBAR:	1/4" A572-50 Steel drawbars - Huck bolted (Bob Tail) - Gr. 8, 1/2" & 20mm
SIDEFRAME:	3/8" A572-50 Sideframe, crossmembers, and tailframe
SHOCK HSG:	Cast Round type - bolted 1/2" Gr. 8
EYE:	Silver Eagle #1171 w/round polyurethane bushings #12171 & hex nut #15315
LIFT HANDLES:	Two, power zone type
TILTSTOP:	Mounted under tail frame (two 1" Plates)
TAILPLATE:	4 TruckLite round LED lamps riveted & guard for license lamp
LEG:	Replaceable rubber block mounted to drawbar supported brackets
	Note: tongue weight not to exceed 65lbs w/ hooks on the handles
5TH WHEEL:	Silver Eagle lever operated w/extended ramp & end cap plate
	Roadside release w/ hitch pin through adjusting rod
	Tilt Limiting Cables
SUSPENSION:	Polyurethane boot, #12172 mounted, transverse type
	Use "Never Seize" on U-Bolts and fasteners
SPRINGS:	7-leaf, 2 stage, 38-1/2" center of eye to center of eye
SAFETY CHAINS:	(2) 5/8" grade 70 chains, Zinc Dichromate finish, U-Bolt mounted w/ protector
	(2) 5 ton clevis hooks Zinc Dichromate finish

FRAME (C	ont.):					
AXLE:		Make-Meritor	Model-TN4671 (5" dia.)		Track - 71.5"
		Capacity - 20,000#			ters - 38-1/2"	
		Cambered, set for 1/	16" toe-in (+/- 1/32")	& 0 deg. Thrust Angle		
		Camshaft enclosure				
S-CAMS:		Q+	28 spline	length: 20.		
		Part No.:	221058391 (Right		2 (Left)	
			ABS sensor bloc			
SLACK ADJUS	TERS:	Haldex S-ABA 6" sla	ck, 28 spline with 1/8	end play on s-cam,		
		"Never Seize" on stai	inless clevis pins and	splines. Standard yok	э.	
		Slack adjusters must	be installed to manu	facturers specifications	, including, but	not limited to
		assuring proper push	nrod length to attain a	pproximately 90 degree	e angle when p	ark brake is applied.
		Should be 107 degre	es when brakes are	released. Stroke shoul	d not exceed 2	on application.
		Slack adjusters and I	brake cam bushings i	must be fully lubricated	after installatio	n.
BEARINGS & R	ACE:	Make - General			nken, Stemco,	
		Outer bearing HM212	2011/HM212049			
		Inner bearing HM218				
		Note: bearing and rad	ce to be from the san	ne manufacturer		
SPINDLE NUT		STEMCO Pro-Torq #				
HUBS:	* This build	Walther EMC cast in		drum assembly		w/ ABS tone ring
		Option: Webb			e-coated and b	
DRUMS:	* This build	Walther EMC cast iro	on hub and cast iron	drum assembly		w/ ABS tone ring
		Option: Webb, Motor			e-coated and b	
STUDS:		10 each mounted on		b Piloted		
HUB CAPS:	* This build	SKF #1644 - Black w			emco DEFEND)ER
HUB OIL:		Synthetic - MOBILUE				
OIL SEALS:		Federal Mogul # M38	30025TXO - 5 Star G	old seal - hub installed		
				ed method - Do not driv	e with hamme	r
BRAKE LINING	:	Q+ Abex - 3030-197				Size - 16.5x7x.75
		Q+ pull-back springs				
CHAMBERS:		Make: Haldex	Service Chambe	rs Part # ?' 127300116		Life Seal - Long Stroke
		Set brake chambers	to 107 degrees when	brakes are not applile	d. Chambers s	
		approximately 90 deg	grees with brakes app	olied and no more than	2" of stroke.	
		Must be long stroke	e actuator.			
TIRES:				Tires to be	inflated to 100	p.s.i.
TIRES:		Bridgestone R197		UBELESS SIZE: 295/		PLY RATING: 14(G)
THREE.		GoodYear G 316 Fue		UBELESS SIZE: 295/		PLY RATING: 14(G)
		Michelin XT1, X Line		UBELESS SIZE: 295/		PLY RATING: 14(G)
	* This build	Yokohama RY587		UBELESS SIZE: 295/		PLY RATING: 14(G)
		Continental HTL Eco		UBELESS SIZE: 295/		PLY RATING: 14(G)
		* Tires should be "				
		Tires to be inflated to				
				along with the DOT da	te	
		Match mount if capal		along manale DOT da		
		materi mount ir capat				

WHEELS:	Accuride # 50487PKBLK21, size 22.5" x 8.25" Hub Piloted
	d Option: Maxion # 90262BK
	Steel - powder coated black
	Outboard mount. (5) hand hole Wheel offset - 6.625"
	Do not paint powder-coated wheel except exposed rim edge to be painted silver
	Apply grease to hub piloted wheel pads before assembly
	Position hub pilot pad to 12 o-clock position before installing wheels
VALVE STEMS:	Myers TR572-F19 (31 degree bend) with Alligator V2B flow through valve stem cap - part #2153
	torque to 35-55 inch-pounds
(Option) VALVE STEMS	Dill, Haltec or Schrader equivalent
ABS SYSTEM:	Bendix 2 sensor - 1 modulator, TABS-6 valve #5014112 service relay valve (S/E 16838)
	Bracket mounted includes odometer & PLC4TRUCKS
	ECM to be programmed preceding with 4 zero's, followed by the unit number
PRESS. PROTECT. VALVE:	Sealco #110257
SYNCRO VALVE:	Bendix SV-4 # w/ #28435 breather on exhaust port
PUSH/PULL VALVE:	Sealco #17620 - No pop-off pressure feature with steel stem
	Install push pull protection bracket
PILOT RELAY VALVE:	Bendix R-12P #109424
EMERG. CONTROL VALVE:	Sealco #110376
RESERVOIR:	(1) Make: Hoosier 1423 cu.in. with side drain
DRAIN VALVE:	(1 ea.) Tramec #35000 with 1/8" cable plastic coated routed to roadside frame
	by front of tire
TUBING:	Parker, Red for emergency, Blue for Service, Black for supply from reservoir
HOSES:	3/8" rubber w/ strain guards
	(1) 36" on service side to lead trailer
	(2) 96" (service & emergency) to towed trailer mounted on vertical surface of
	front crossmember below upper flange of drawbars
GLADHANDS:	Phillips Universal Cast #12-41010
	(1) fixed, mounted on drawbar, w/ polyurethane seal - painted red (incoming air)
	(1) on 36" whip hose, w/ polyurethane seal- painted blue (incoming air)
	(1) on 96" hose, w/ polyurethane seal - painted red (to towed trailer) (1) on 96" hose, w/ polyurethane seal - painted blue (to towed trailer)
	All gladhand seals to be full face (flapper) with screens

FINISH:		
FRAME:	Hot Dipped Galvanizing per ASTMA 123/A 123M-97a as separate pieces	
	prior to assembly	
FRAME HUCK-BOLTS:	Spot paint bolts with Cold Galvanizing spray	
AXLE, AIR RESERVOIR,		
U-BOLTS & FIFTH WHEEL:	Grit blasted, 8 stage zinc phosphate and cleaning	
	E-Coated PPG CF590-534 Black, Epoxy Primer - baked @375 deg. F.	
	Topcoated, HD Acrylic Polyurethane, UPS gray	
	Color to match Sherwin Williams Genesis #G35-32669	
LEAF SPRINGS:	Primed & topcoated w/ Acrylic Polyurethane	
ALUMINUM, BRASS, NYLON,		
RUBBER, CHAIN & HOOKS:	Manufacturer's finish	
FASTENERS:	Zinc Plated	
LIGHTING / ELECTR	NCAL :	
INTERVEHICLE CABLES:	(1) Phillips 7 ft. straight cable - 8/10/12 Ga. Wiring	
	(1) Phillips 11 ft. straight cable - 8/10/12 Ga. Wiring	
FRONT RECEPTACLES:	(2) Phillips #16-726 plug-in type w/ split pins	
HARNESS:	Phillips QCS molded assembly with full 8/10/12 cable between receptacles w/	
	lead to ABS valve , and rear sill. Connectors for Trucklite LED lamps built into	
	harness (no jumpers) with shrink tubing at each AMP connector	
LIGHTING / ELECTR	RICAL (cont.):	
LAMPS:	(4) Trucklite #44322R red 6 LED, 4" round, stop tail and turn	Anti-theft rings
(ICC/ATA REQUIRED LIGHTING)	(1) Trucklite #30257Y incandescent ABS indicator light mounted in roadside draw	vbar
	(1) Trucklite#15219 LED License Lamp w/ pigtail & AMP connector	
	w/ #97032 gasket & #15729 bracket	
WIRING PLUG ENDS:	AMP at rear for LED lights	
WIRING COLOR CODE:	Black -2 tail lights,	
	Brown License plate light, 2 tail lights.	
	Green-right turn Yellow-left turn Red-stop	White-ground
	Blue-auxiliary Constant power ABS function on blue	
REFLECTORS:	Mfg. standard as required by law	
GROUND:	Stainless steel ground strap between fifth wheel pedestal and rear frame	
	(eye grounded to frame by stainless steel retaining cable)	
	Note: Dielectric lube is to be applied to all connections and to 7-way receptacle.	
	7-way connectors use dielectric grease, LED lamp pins to be lightly coated	

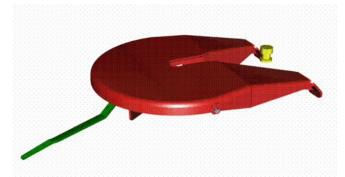

ACCESSORIES:	
MUD FLAP:	Anderson aerodynamic 24" x 18"
	Plain black-no logo
HANGER:	Betts Direct Flex Hanger, 25" long - Galvanized. (Vertical mounting bracket is painted)
	Bracket huck bolted to bar. Locking nuts and fender washer on forward side of flap.
LOOM	Spiral Wrap on wires and brake tubing
PUSH PULL GUARD	Bolt-on Guard to prevent damage to Push/Pull valve and avoid hose hooking on knob.
DOCUMENT BOX:	Aluminum Line #: 23891 Document Holder w/o Clip
	Grote pouch mounted in document box
	Additional, laminated copy of registration inserted in document box body
	Include original of Federal Annual Inspection form in document box, keep a record copy.
DECALS:	Furnish and install unit and car numbers 1-1/2 high on reflective decal onto each drawbar.
	Furnish and install TT165 New York Thruway decal
None required - remove:	Furnish and install Do Not Sandblast Decal to document box
None required - remove:	Hub Piloted Wheel System decals mounted on side of ballast hanger
-	Fifth Wheel Operation decal mounted to top of curbside drawbar
	Gladhand storage decal mounted to top of curbside drawbar
	Hostling Valve decal mounted on center of valve plate
None required - remove:	Accuride Decal mounted inside document box
	Perform Fed. Annual Inspection (Install document in document box)
	Install FAI Decal near VIN plate - UPS part number 3416634 - Vomella Graphics
	Date on FAI decal should be based on a date near time of delivery
	(Month and Year Only) - do not pre-date
	Furnish and install 5" UPS logo on curbside drawbar
	Furnish and install PMI date on record box, letters to be 1.50" high
	PMI date must be based on a <u>11 month</u> cycle from date of inspection
OTHER:	No manufacturers identification decals or logos
	Aluminum VIN plate mounted roadside drawbar
	Additional Vehicle I.D. plate mounted in curbside tailframe
	Install Mylar tape on backside of license plate - secure with Huck rivets
	Unit serial number & car number engraved on the curbside drawbar in .50" min. height
	No Bendix ABS information decal
NOTE:	FAI decals are to be supplied by Silver Eagle
POGO STICK/BASKET:	Pogo stick to be installed on valve plate and expanded metal basket to be installed
	between frame - pogo stick Phillips #17-0201 Gold Chromate finish or equivalent
	Pogo stick to include two 6" springs w/ 4 hole clamp
PARTS BOOK	Furnish an electronic parts book for this build. Parts book information will be loaded on
	a UPS internal web based parts program (FleetCross).

SILVER EAGLE FIFTH WHEEL OPERATING INSTRUCTIONS

Coupling

- 1. Make sure jaw is locked open and trailer is at proper height.
- 2. Back dolly slowly under trailer until jaw locks kingpin and handle moves to the center of the dolly.

Uncoupling

1. With vehicle at rest in a relaxed condition and landing gear down, (not being pushed together or pulled apart), pull fifth wheel handle upward and outward to lock the fifth wheel open.

2. Pull dolly slowly out from under the trailer.

Note

If the handle will not pull outward when the vehicle is in a relaxed condition, use landing gear to raise trailer and unload the dolly fifth wheel.

Contact Silver Eagle Customer Service for a video tape on coupling and uncoupling twin/double trailers SINGLE AXLE CONVERTER DOLLY

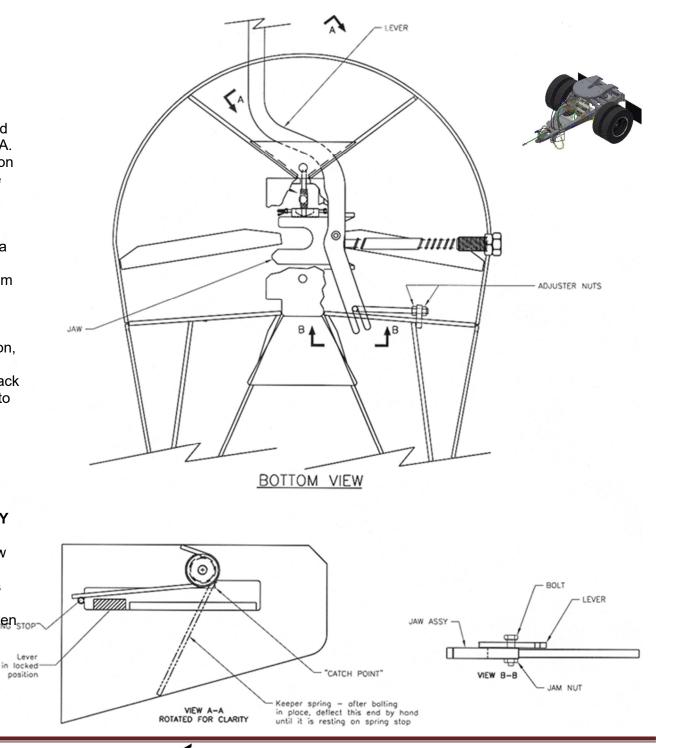

PERFORMANCE TESTING/ADJUSTMENTS

- Pull the lever into the uncoupling position. This is where the lever is pulled out and held up by the "Catch Point" indicated in view A-A. If the lever won't stay up, the adjuster nuts on the adjuster at the back end of the lever are probably screwed in too far. Back them off until lever will stay on the catch point.
- 2. Test the 5th wheel for proper coupling with a test kingpin. Test with the lever in the uncoupling position. If it doesn't release from the "catch point", then the adjuster nuts probably need to be screwed in further.
- 3. With the jaw closed or in the coupled position, pick the lever up and out of the locked position. Hold the lever just shy of falling back into the locked position. Release the lever to ensure that it passes freely into the locked position.
- 4. When 5th Wheel functions properly, tighten the lever adjuster locknut securely.

ADJUSTMENT OF LEVER & JAW ASSEMBLY

- 1. Release Jam Nut (refer to View B-B)
- 2. Tighten bolt until lever is secure against Jaw assembly.
- 3. Loosen bolt ¼ turn or until assembly moves freely.
- 4. While holding bolt secure from turning, tighten stopjam nut.

SILVER

For Parts Call (800) 547-6792 or (503) 335-2136 S:\RockyeC\PART MANUALS\ UPS-33000-WEB-RØ

SILVER EAGLE FIFTH WHEEL MAINTENANCE

Jaw Removal (Refer to Diagram D)

- 1. Make sure the jaw is closed. If not, it can be closed by pushing the trip block (16) forward with a rod or bar. The jaw should be all the way across the center casting (the handle will be in). **Caution: Keep your hands clear of the jaw, it is spring-loaded.**
- 2. Using a pair of vise grips, clamp the trip lock rod in front of the guide hole on 5th wheel center casting (16) so as to prevent it from moving aft when jaw is removed.
- 3. When removing the guide bolt (25), applying an anti-seizing compound to the exposed threads often makes the removal process easier.
- 4. Remove the jaw spring (22) by pulling it through the push rod guide nut.
- 5. Pull the fifth wheel lever (19) all the way out.
- 6. Disconnect the fifth wheel lever (19) from the jaw/pushrod assy (18).
- 7. Remove the jaw/pushrod assy (18) from the 5th wheel table.
- 8. Lubricate and install the replacement jaw/pushrod assy (18) in the table making sure the pointed tine on the jaw is to aft end of the dolly
- 9. Slide jaw/pushrod assy in place without spring. Align hole in jaw with mating hole in lever.
- 10. Apply loctite 242 medium strength thread adhesive or equivalent to cleaned threads of capscrew (23) and jam nut.
- 11. Thread capscrew (23) into jaw/pushrod assy (18) with two washers (20) between the capscrew head & the lever. Torque the jaw bolt to approximately 70 ft-lbs. The lever should have minimum clearance to allow free rotation against the jaw without binding through its full travel.
- 12. Tighten the jam nut (1/6-1/4) turn after contacting the jaw while ensuring the capscrew does not turn.
- 13. Slide pushrod spring (22) on push rod of the jaw.
- 14. While holding lever back far enough so the jaw pushrod protrudes into the guide nut, tighten the guide nut (25) securely
- 15. Remove the vise grips from the trip block rod.
- 16. Test the table to ensure the jaw opens and closes properly.

Jaw Spring Removal/ Reassembly (item 22)

- Complete steps 1 through 4 of Jaw Removal.
- Completes steps 13 through 17.

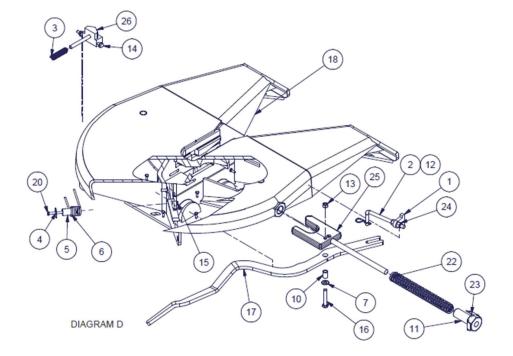

Lever Removal/ Reassembly (item 17)

- ➢ Remove lever (17)
- During Reassembly make sure the 2" jam nut is jammed to the 2" standard nut.
- Test the table to ensure the jaw opens and closes properly.

Lever Removal/ Reassembly

- Complete step 1 & 6 of jaw removal
- Install new lever
- > Complete steps 10 thru 12 of jaw removal.
- > Test the table to ensure the jaw opens and closes properly.

SILVER

TRIP BLOCK / TRIP BLOCK SPRING REMOVAL / REASSEMBLY

- Complete steps 1 through 5
- > Remove the 3/8 bolt, 3/8 lock nut and the two 3/8 washers
- Release the vise grips. Caution: The trip block is under spring Pressure. Keep hands clear of it when releasing vise grips.
- Remove the trip block (16) and the trip block spring through the throat of the 5th wheel table. Caution: The jaw is under spring pressure. Use pliers or another suitable devise to remove old trip block and spring.
- Install the new trip block and / or trip block spring in the throat of the 5th wheel table. Caution: The jaw is under spring pressure. Use pliers or another suitable devise to install new trip block and spring.
- Push the trip block (16) as far forward as possible, with a rod or bar and reinstall vise grips to the trip block rod of item (16) in front of 5th wheel center casting.
- With anti-seize applied to the 3/8 bolt, reinstall the bolt, two washers and lock nut making sure the trip block can freely move fore and aft when pushing on it with a rod or bar (leaving the lock nut 1/6"-3/32" from being fully tightened should work well).
- Release the vise grips. Caution: The trip block is under spring pressure.
 Keep hands clear of it when releasing vice grips.
- > Test the table to ensure the jaw opens and closes properly.

DRAWBAR EYE REMOVAL & INSTALLATION INSTRUCTIONS

- 1. Place dolly under a trailer. Set brakes on trailer and dolly.
- 2. Remove safety wire if present, on 1283 nut.
- 3. Remove 1283 nut and 1193 washer or 15315 and 15660
- 4. Use forklift or eye removal tool (Silver Eagle part no. 15314) to pull against drawbar eye and remove it from the shock housing.
- 5. Clean any debris from inside of shock absorber bushing and lubricate with rubber lubricant or soapy water
- 6. Lubricate the shock absorber bushing with rubber lubricant or soapy water and install into the shock housing.
- 7. Lubricate the shank of the new drawbar eye with rubber lubricant or soapy water and install into the shock housing.

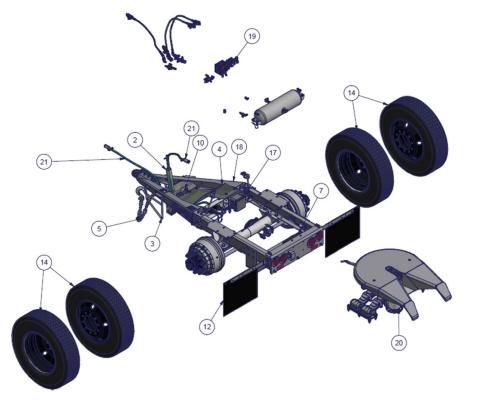

NOTE: The shank of the drawbar eye will only be able to be pushed into the shock absorber bushings a little way by hand. There are three methods of pushing it in the final amount:

- (1) Place the dolly under a trailer or up against a sold wall. Set the brakes on the trailer and dolly. Use a forklift or hostler to push against the drawbar eye until it is seated on the shock absorber bushing.
- (2) Use a sledge hammer to hammer on the end of the drawbar eye until it is seated in the shock absorber bushing.
- (3) Use the eye removal tool as #4 above.
- 8. After the drawbar eye is in place, clean the threads on the shank. **VERY IMPORTANT:** Coat the threads with Never-SeeZ, pipe compound, or some other similar product. to prevent corrosion and keep the nut from seizing.
- 9. Install a new washer and thread the nut onto the shank.
- 10. Tighten the nut until the rubber shock absorber bushing bulges toward the outer edge of the shock housing at the corners this is approximately 400-500 ft/lbs of torque.
- NOTE: Shock absorber bushing may split if tightened excessively.
- 11. Install the safety/ground wire through one side of the nut and shank. This is accomplished by drilling through one side of the nut and shank providing a hole for the bolt and nut securing the safety wire. This completes the ground circuit and prevents the nut from backing off.
- 12. Periodically check the tightness of the nut and adjust as necessary. You should not be able to turn the lunette eye by hand at any time.
